Contents

VOLUME 17, NUMBER 1, MARCH 1992
Published 25 March 1992

MARTIN ALUJA and RONALD J. PROKOPY
Host search behaviour by *Rhagoletis pomonella* flies: inter-tree movement patterns in response to wind-borne fruit volatiles under field conditions 1–8

L. BARTON BROWNE and A. C. M. VAN GERWEN
Volume of protein meals taken by females of the blowfly, *Lucilia cuprina*: ovarian development-related and direct effects of protein ingestion 9–18

FRANZ BOGNER
Response properties of CO_2-sensitive receptors in tsetse flies (Diptera: *Glossina palpalis*) 19–24

ANN CLOAREC
The influence of feeding on predatory tactics in a water bug 25–32

C. J. DEN OTTER and W. M. VAN DER GOES VAN NATERS
Single cell recordings from tsetse (*Glossina m. morsitans*) antennae reveal olfatory, mechano- and cold receptors 33–42

J. B. FREE, A. W. FERGUSON and J. R. SIMPKINS
The behaviour of queen honeybees and their attendants 43–55

V. JAGANNADH and V. S. K. NAIR
Azadirachtin-induced effects on larval–pupal transformation of *Spodoptera mauritia* 56–61

L. KAISER and R. T. CARDÉ
In-flight orientation to volatiles from the plant-host complex in *Cotesia rebecula* (Hym.: Braconidae): increased sensitivity through olfactory experience 62–67

P. L. MILLER
The effect of oxygen lack on egg hatching in an Indian dragonfly, *Potamarcha congener* 68–72

ANDREAS STUMPNER and KLAUS-GERHARD HELLER
Morphological and physiological differences of the auditory system in three related bushcrickets (Orthoptera: Phaneropteridae, *Poecilimon*) 73–80

W. A. TIMMINS and S. E. REYNOLDS
Physiological mechanisms underlying the control of meal size in *Manduca sexta* larvae 81–89

LOUISE E. M. VET and DANIEL R. PAPAJ
Effects of experience on parasitoid movement in odour plumes 90–96

JAY A. YODER and DAVID L. DENLINGER
Water vapour uptake by diapausing eggs of a tropical walking stick 97–103

BOOK REVIEWS 104–105

VOLUME 17, NUMBER 2, JUNE 1992
Published 12 June 1992

M. BAYLIS and N. E. PIERCE
Lack of compensation by final instar larvae of the myrmecophilous lycaenid butterfly, *Jalmenus evagoras*, for the loss of nutrients to ants 107–114

C. S. BURKS, L. D. EVANS, Y. KIM and E. S. KRAFSUR
Effects of precocene and methoprene application in young adult *Musca autumnalis* 115–120

COLLEEN A. CANNON and RICHARD D. FELL
Cold hardiness of the overwintering black carpenter ant 121–126

DAVID L. DENLINGER and JAN ŽĎÁREK
Rhythmic pulses of haemolymph pressure associated with parturition and ovulation in the tsetse fly, *Glossina morsitans* 127–130

K. E. FOGG, D. HYDE and J. H. ANSTEE
Assessment of a strontium capture technique for cytochemical localization of potassium-dependent phosphatase in Malpighian tubules of *Locusta* 131–140

GABRIELLA GIBSON
Do tsetse flies 'see' zebras? A field study of the visual response of tsetse to striped targets 141–147

GORDANA GRUBOR-LAJSIC, WILLIAM BLOCK and ROGER WORLAND
Comparison of the cold hardiness of two larval Lepidoptera (Noctuidae) 148–152

J. HENDRICHS, S. S. COOLEY and R. J. PROKOPY
Post-feeding bubbling behaviour in fluid-feeding Diptera: concentration of crop contents by oral evaporation of excess water 152–161

PAUL A. HORNE
Respiration rates of two closely related species of carabids in Australia 162–164

M. HODKOVA, L. SOMME, R. HANZAL, V. BRUNNHOFER and I. HODEK
The effect of allatectomy and photoperiod on the supercooling point in *Pyrrhocoris apertus* adults 165–168

CAROL I. MILES
Temperature compensation in the nervous system of the grasshopper 169–175

M. E. TZANAKIS, R. L. VEENENDAAL and A. VEERMAN
Effects of photoperiod and temperature on the termination of diapause in the univoltine seed wasp *Eurytoma plotnikovi* 176–182

J. L. TODD, K. F. HAYNES and T. C. BAKER
Antennal neurones specific for redundant pheromone components in normal and mutant *Trichoplusia ni* males 183–192

EDWARD L. VARGO and LUC PASSERA
Gyne development in the Argentine ant *Iridomyrmex humilis*: role of overwintering and queen control 193–201

VOLUME 17, NUMBER 3, SEPTEMBER 1992
Published 10 August 1992

I. HELENA ANDERSSON
The effect of sugar meals and body size on fecundity and longevity of female *Aedes communis* (Diptera: Culicidae) 203–207

ULRICH BÄSSLER
Variability of femoral chordotonal organ reflexes in the locust, *Locusta migratoria* 208–212

YOSHIHIKO CHIBA, YASUHIRO SHINKAWA, MAKOTO YOSHII, AKIRA MATSUMOTO, KENJI TOMIOKA and SUSUMU Y. TAKAHASHI
A comparative study on insemination dependency of circadian activity pattern in mosquitoes 213–218

E. DONAHAYE
Physiological differences between strains of *Tribolium castaneum* selected for resistance to hypoxia and hypercarbia, and the unselected strain 219–229

Y. C. DROST and R. T. CARDÉ
Influence of host deprivation on egg load and oviposition behaviour of *Brachymeria intermedia*, a parasitoid of gypsy moth 230–234

F. J. ELLER, J. H. TUMLINSON and W. J. LEWIS
Effect of host diet and preflight experience on the flight responses of *Microplitis croceipes* (Cresson) 235–240

JENS KRAUSE, DAVID BROWN and SARAH A. CORBET
Spacing behaviour in resting *Culex pipiens* (Diptera, Culicidae): a computer modelling approach 241–246

A. LENGA and J. HUIGNARD
Effect of changes in the thermoperiod on reproductive diapause in *Bruchidius atrolineatus* Pic (Coleoptera: Bruchidae) 247–254

CHRISTINE A. NALEPA and DONALD E. MULLINS
Initial reproductive investment and parental body size in *Cryptocercus punctulatus* (Dictyoptera: Cryptocercidae) 255–259

KENNETH A. PIVNICK, JANY LAVOIE-DORNIK and JEREMY N. MCNEIL
The role of the androconia in the mating behaviour of the European skipper, *Thymelicus lineola*, and evidence for a male sex pheromone 260–268

CHRISTINE YING-SHIN PENG, CHIH-MING YIN and LUCY R. S. YIN
Effect of rapid freezing and thawing on cellular integrity of honey bee sperm 269–276

R. V. SESHACHALAM, M. V. V. SUBRAMANYAM and R. V. KRISHNAMOORTHY
Glutamine synthetase activity during embryonic and larval development of the silkworm *Bombyx mori* L. and role of a JH analogue 277–280

R. V. SESHACHALAM, M. V. V. SUBRAMANYAM and R. V. KRISHNAMOORTHY
New pathway of utilization of ammonia nitrogen for the synthesis of amino acids through NADH dependent transaminases in *Bombyx mori* L. 281–287

NICOLETTE W. M. VAN BUREN, ADRIANA G. H. MARIËN, ROB C. H. M. OUDEJANS and HAYO H. W. VELTHUIS
Perizin, an acaricide to combat the mite *Varroa jacobsoni*: its distribution in and influence on the honeybee *Apis mellifera* 288–296

M. G. V. WICKREMASINGHE and H. F. VAN EMDEN
Reactions of adult female parasitoids, particularly *Aphidius rhopalosiphi*, to volatile chemical cues from the host plants of their aphid prey 297–304

JAN ŽĎÁREK, DAVID DENLINGER and LEONARD H. OTIENO
Does the tsetse parturition rhythm have a circadian basis? 305–307

BOOK REVIEW 308

VOLUME 17, NUMBER 4, DECEMBER 1992
Published 1 December 1992

PING-CHU CHU, K. J. GIROUX and R. E. STINNER
A dynamic model of water gain and loss in larval Mexican bean beetle 309–315

PING-CHU CHU, R. E. STINNER and K. J. GIROUX
A dynamic model of larval Mexican bean beetle survival as a function of body water balance 316–324

V. G. Dethier and E. Bowdan
Effects of alkaloids on feeding by *Phormia regina* confirm the critical role of sensory inhibition 325–330

J. Dean and J. Schmitz
The two groups of sensilla in the ventral coxal hairplate of *Carausius morosus* have different roles during walking 331–341

P. M. Lösel, P. M. Guerin and P. A. Diehl
Feeding electrogram studies on the African cattle brown ear tick *Rhipicephalus appendiculatus*: evidence for an antifeeding effect of tick resistant serum 342–350

S. J. Simpson
Mechanoresponsive neurones in the suboesophageal ganglion of the locust 351–369

Radomir Socha and Jan Sula
Voltinism and seasonal changes in haemolymph protein pattern of *Pyrrhocoris apterus* (Heteroptera: Pyrrhocoridae) in relation to diapause 370–376

M. Takahashi-Del-Bianco, A. A. Benedito-Silva, M. J. A. Hebling, N. Marques and M. D. Marques
Circadian oscillatory patterns of oxygen uptake in individual workers of the ant *Camponotus rufipes* 377–383

Robert K. Vander Meer, Laurence Morel and Clifford S. Lofgren
A comparison of queen oviposition rates from monogyne and polygyne fire ant, *Solenopsis invicta*, colonies 384–390

Marlies Vaz Nunes and Jim Hardie
Photoperiodic induction of winged females in the black bean aphid, *Aphis fabae* 391–396

Diana E. Wheeler and Norman A. Buck
Protein, lipid and carbohydrate use during metamorphosis in the fire ant, *Solenopsis xyloni* 397–403
